DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Jaffe et al. (U. S. PAT. 6,510,518).

In claim 1, Jaffe et al. teaches all claimed features in Fig. 7, an apparatus for processing data, comprising: a plurality of input signal lines (A1, B1); a plurality of output signal lines (O1, O2); and an electronic circuit (610) configured to input first data from the plurality of input signal lines and to output second data (outputs) to the plurality of output signal lines, the first data (input signal) being one bit data represented by a combination of bits of the plurality of input signal lines, and the second data (output signal) being one bit data represented by a combination of bits of the plurality of output signal lines (Fig. 8).

In claim 2, Jaffe et al. further teaches the apparatus according to claim 1, wherein the combination of bits of the plurality of signal lines of the one bit data "0" is a first bit status (False; col. 4, line 64), and the combination of bits of the plurality of signal lines of the one bit data "1" is a second bit status (True; col. 4, line 62), and wherein a hamming weight of the first bit status is equal to a hamming weight of the second bit status (col. 4, line 56).

Claim 19 corresponds to detailed circuitry already discussed similarly with regard to claim 1.

3. Claims 3-13 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 14-18 appear to comprise allowable subject matter(s).
